

Product Sales Insights Dashboard | Microsoft Excel

Project Description:

Developed an interactive Sales Insights Dashboard in Microsoft Excel to analyze sales performance and generate business insights using data visualization and reporting techniques.

Key Highlights:

- Created an interactive dashboard to monitor annual sales performance across multiple years.
- Analyzed store-wise sales trends and identified top-performing stores.
- Compared Wholesale vs Retail sales distribution using charts.
- Evaluated the impact of discounts and promotional codes on sales.
- Visualized manager performance and payment method distribution.
- Used Pivot Tables, Pivot Charts, Data Cleaning, and Dashboard Design to transform raw data into meaningful insights.

Tools & Skills:

Microsoft Excel • Pivot Tables • Pivot Charts • Data Cleaning • Data Analysis • Dashboard Creation • Data Visualization
